

2.1 Sport shapes and geometry

Date:

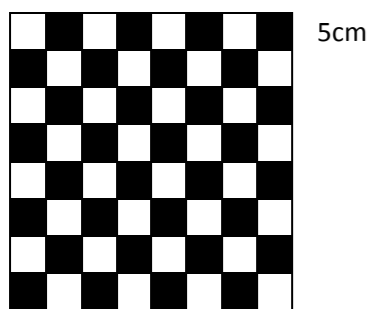

To examine shapes and geometry in sport

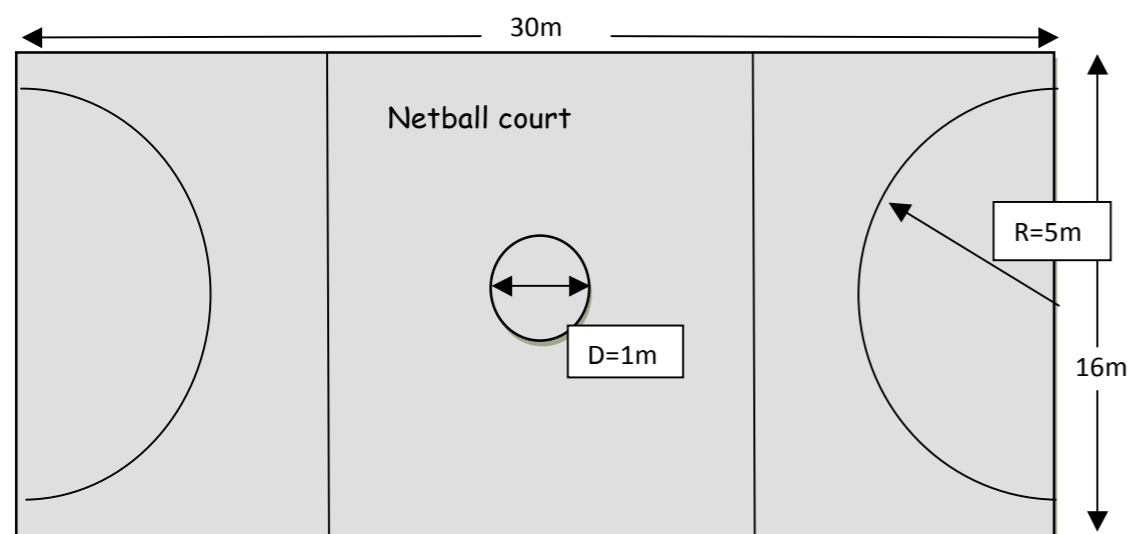

Shapes Found In Sport

Many different shapes are found in sport. Here are some examples.

Chess board

Dart board

Geometry Terms

We can describe these shapes using the geometry terms below.

Square	Right angle	Dimensions	Circle	Diameter	Radius
Rectangle	Perimeter	Semicircle	Angle = 72°	Circumference	Arc

Write sentences describing the shapes of the chess board, dart board and netball court. Use all or most of the geometry terms listed on the previous page.

CONCLUSION: What I have done...
